HOW SHOULD THE TAXES FROM NORTH SEA OIL AND GAS BE SPENT?

University College, Cardiff

P O Box 78, Cardiff CF1 1XL
Telephone Cardiff 44211

Dear Sir/Madam,

Even if you don't pay income tax you will pay some indirect taxes such as value added tax, or local rates, and you will also benefit from government expenditure You will have heard that the Government will receive for some years many millions of pounds in taxes from North Sea oil and gas and that they are discussing what to do with this money People can, of course, have different opinions as to whether the government should be involved in the oil industry But we are not concerned with that only with your views on how the money should be used as long as it is available

We can think of the money as a sort of legacy, which the government can pass on to the citizens either by providing things for them (making expenditures), or by leaving them with income to buy things for themselves (by reducing their taxes), or some of each This questionnaire gives you a chance to say what you think

Parts 1 and 2 of the questionnaire go together Part 1 shows how each pound of Central and Local Government expenditure was spent in 1976 and how each pound was raised With the help of special gummed slips you are asked to say which services there should be more of, or which taxes you would like to see cut, or some of each Part 2 lists the main items which appear under each heading of Part 1, to help you decide and to say more about your choices

Part 3 asks a few questions about yourself so that the results can be arranged in various ways Your name and address does not appear on the questionnaire and both are completely confidential Your reply will be added to the rest from the large number sampled In this way it will not be possible for anyone to know what you individually have said, but your reply is important so that due weight can be given to your views The replies when grouped together will be published so that your views will help to form public opinion on these matters

As the heading above shows, this survey is being carried out by members of the University of Cardiff, we are doing so with assistance from the Social Science Research Council

At a time when there is so much talk about taxes and the way the money is spent, I think you will find it interesting to complete this form Please note that you can change your choices in Part 1 by moving the gummed slips

I hope that you can find the small amount of time needed to complete this important questionnaire Please do so today and return it to me in the enclosed pre-paid envelope

Thank you for your co-operation

Yours faithfully,

G C Hoorley

PART 1

HOW WOULD YOU LIKE THE NEW FUNDS USED?

*The columns to the right (on pages 2 to 4 which fold out) represent how each pound of Government expenditure was spent in 1976 and how each pound was raised.

*Assume that the gummed coupons are new funds that may be used for new expenditures, by placing them in the boxes above each column, or for tax reductions by placing the coupons below the tax columns. If you wish to allocate more funds than there are spaces, place the coupons on the columns.

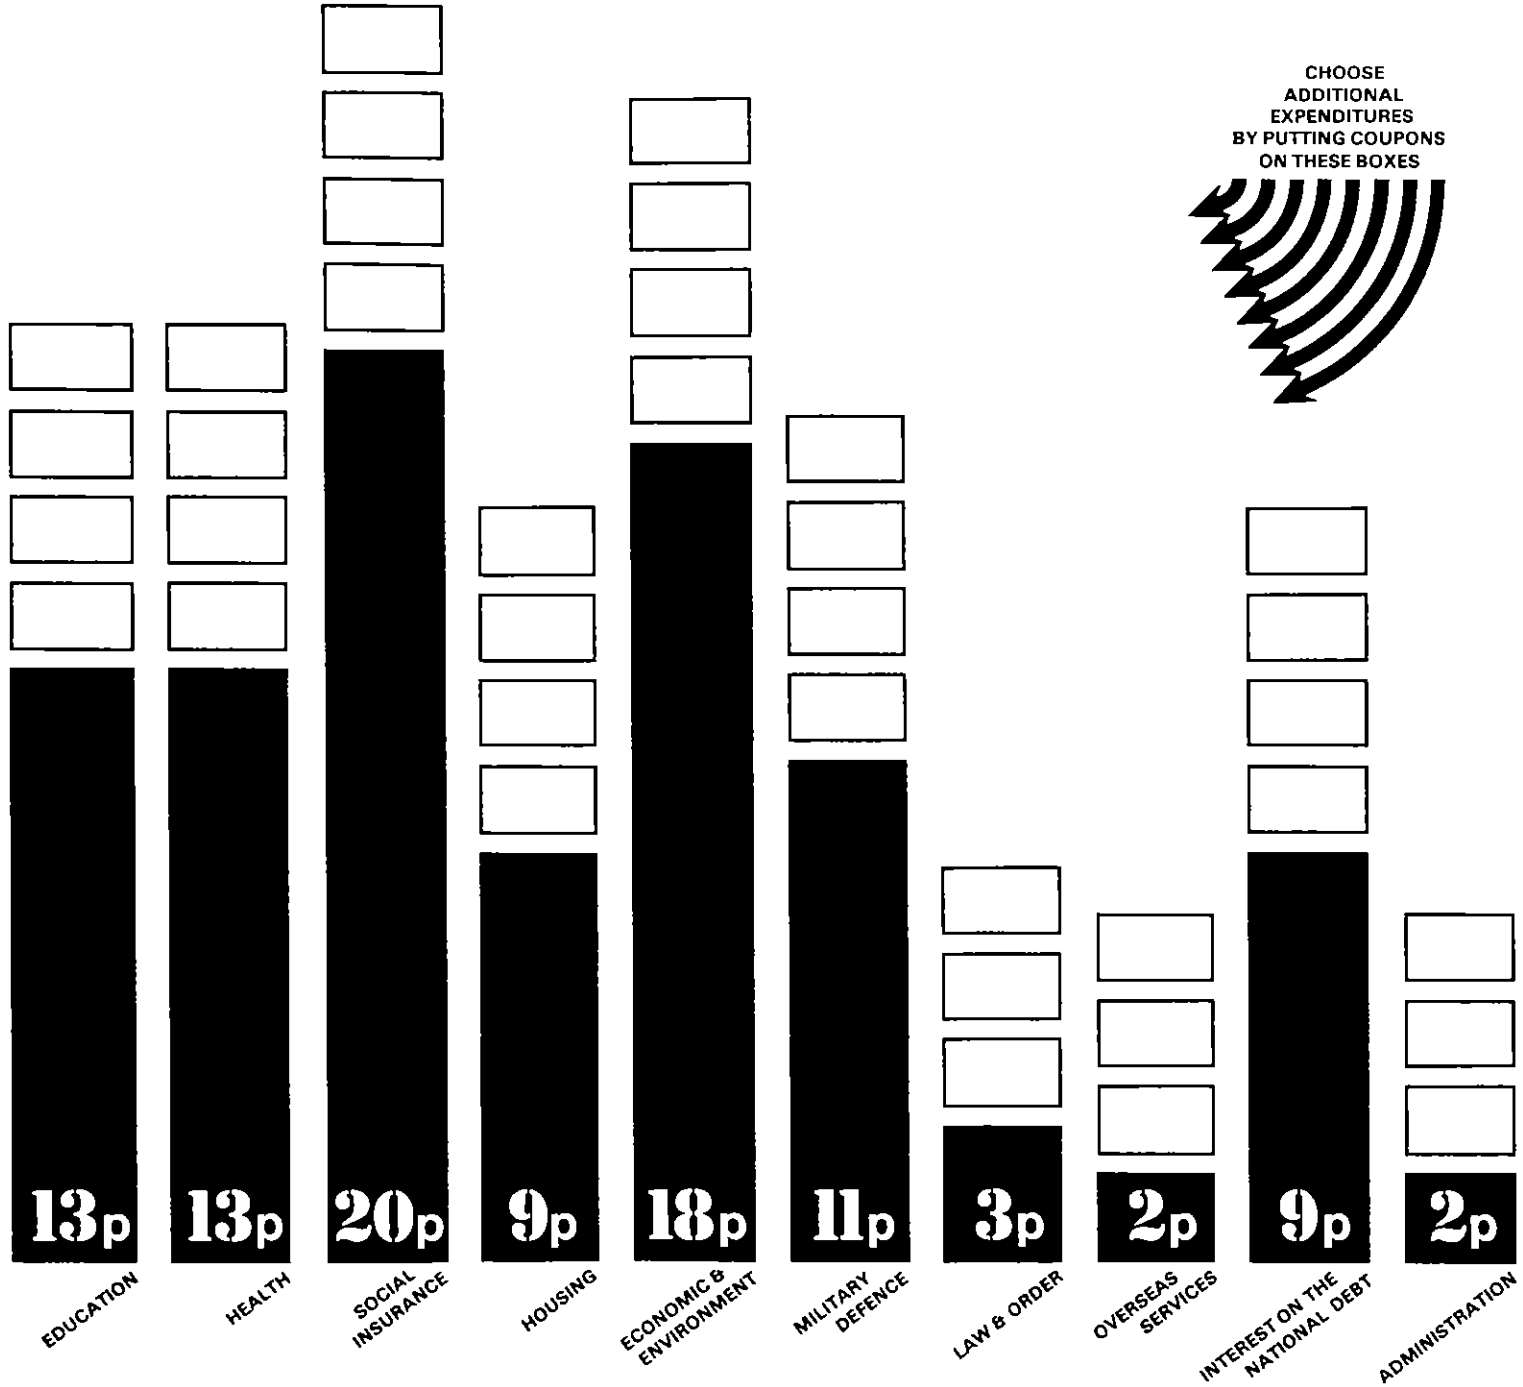
*Show your choice by dividing all of the 20 coupons in any way you wish. You may place them all on expenditures, all on tax relief or use some for expenditure increases and some for tax reductions.

*Your choices are important. Please make them carefully. Part 2 overleaf lists the major items which appear under each heading in Part 1. You will find this information helpful in making your choices in this section as well as enabling you to give more details of the changes you would like to see made.

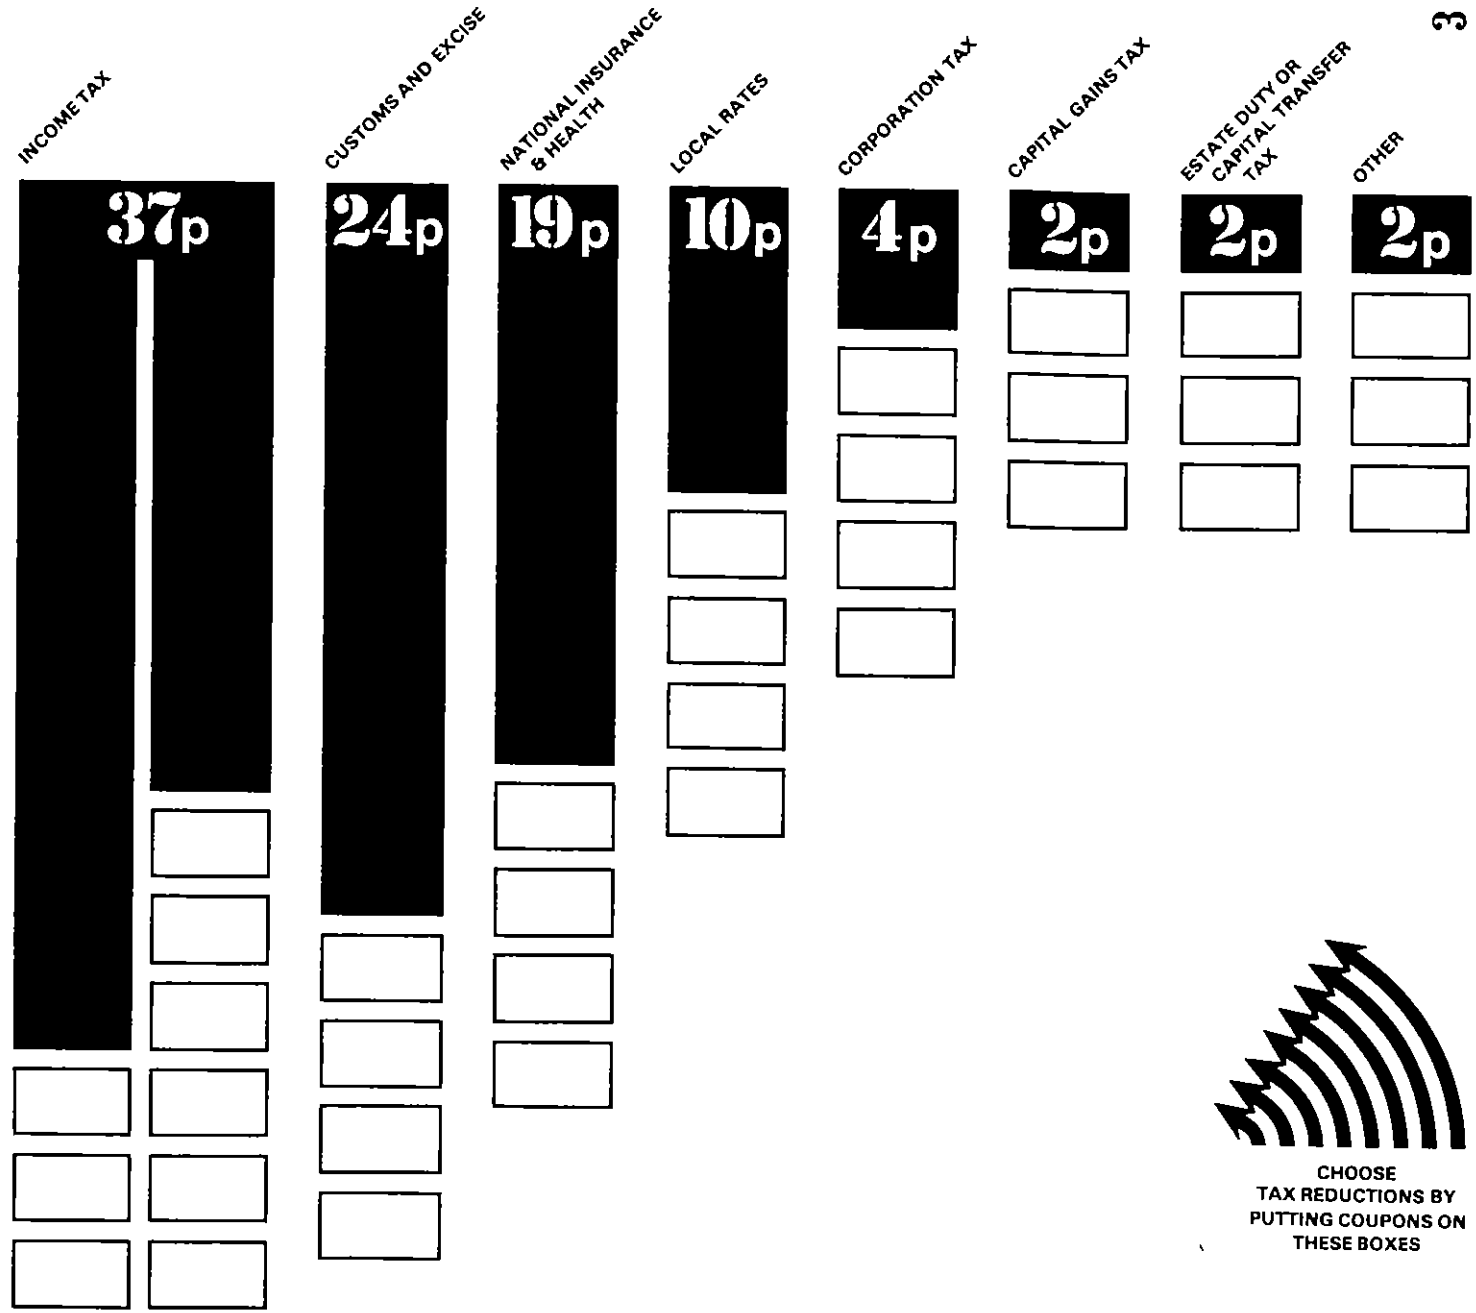
PART TWO LISTS THE MAJOR ITEMS WHICH APPEAR UNDER EACH HEADING

HOW GOVERNMENT SPENDS EACH POUND

CHOOSE ADDITIONAL EXPENDITURES BY PUTTING COUPONS ON THESE BOXES



HOW GOVERNMENT RAISES EACH POUND



PART 2

WHICH PROGRAMMES SHOULD BE EXPANDED OR STARTED?

INSTRUCTIONS In Part One you have indicated your allocation of resources This section enables you to expand your choice by putting a number beside those programmes that you think should be expanded or started and/or the kind of tax changes you would like to see made If you wish to suggest something not included there is an Other' option under each heading so that you can write your choices in Your priority choice should be given Number 1 your next choice Number 2 and so on if you have further choices

For example if in Part One you have not allocated any coupons to Health then you have nothing to do in this section under Health If you indicated in Part One that you wished to spend more on education and your first choice for the use of the money is for Special (handicapped) education your second choice for more Nursery education and that you also wished more subsidies to be given for school children s educational visits abroad to indicate your wishes you would complete the Education sector thus
